Proposed changes to the Faculty Handbook

Proposal 1: 3.2.2(e)

Reason for Request:

Handbook needs to be more explicit that a candidate must meet the criteria for Associate Professor as well as the criteria for academic tenure to be granted tenure. This was in the old handbook 3.8.5.13 and an old Faculty Senate FAQ

Current Language:

- **3.2.2 (e) Application for Tenure**. An Assistant Professor must be considered for tenure during their sixth academic year (or earlier if they have been granted credit toward tenure). However, an Assistant Professor who has demonstrated exceptional performance by exceeding the Department's criteria during their probationary period may apply for promotion and tenure during their fifth academic year.
- i. All applications for tenure shall be made in accordance with the requirements outlined in the AASOPs.
- ii. An Assistant Professor may elect to be evaluated under either the Department's current criteria for promotion and tenure or the criteria that was in effect at the time of their hire. The faculty member must notify the Department Chair of their choice at the time they submit their application. If the faculty member does not notify the Department Chair of their choice as a part of their promotion and tenure materials, the faculty member's materials will automatically be evaluated under the Department's current criteria.

Proposed Language:

Faculty Workload Annual Reporting Template (May 2025)

Institution: Appalachian State University

Academic Year: 2024-2025

Submitted by: Jamie Parson, Interim Senior Vice Provost, Academic Affairs

Submission Date: August 21, 2025

BOT Authorization date: [Insert Date]

1. Institutional Overview:

Faculty members self-report their workload across the three primary areas of academic responsibility: teaching, research, and service for fall 2024 and spring 2025 across academic departments, and across academic colleges and schools. In addition, detailed data is provided in Table 4 showing actual instructional activities, including course sections, student credit hours, total contact hours, weekly contact hours, average contact hours, total FET, and faculty contact hours by total FTE and instructional FTE.

Appalachian State University honors its founding commitment to educational access and excellence and its rural mountain heritage through teaching, research, and service. App State's resilient culture, innovative academic programs, and exemplary faculty and staff prepare students to be leaders who actively contribute to their communities. As one of 17 campuses in the University of North Carolina System, App State enrolls more than 21,500 students, has a 16:1 student-to-faculty ratio, and offers more than 150 undergraduate majors and more than 90 graduate programs through its campuses in Boone and Hickory, as well as its online learning programs, including Flight Path through Project Kitty Hawk.

In 2023, App State opened a campus in Hickory, about 40 miles southwest of Boone. This Catawba County site allows App State and the UNC System to reach the largest urban population in the state that prior to the opening of the App State campus, did not have a public university, making higher education affordable for residents in the Hickory area. Whether at high elevation in the Blue Ridge Mountains or nestled in Catawba Valley, App State's two campuses serve as living-learning laboratories, providing students with hands-on experience in their fields.

App State is guided by its mission statement: "Appalachian State University, a constituent member of the University of North Carolina System sustained by the generous support of North Carolinians, is a long-established public institution that honors our founding commitment to educational access and excellence and our rural mountain heritage through teaching, research, and service. The university's vibrant culture shapes students into globally minded, responsible members of society who engage with and actively contribute to their communities. Our exemplary faculty and staff prepare students in bachelor's, master's and professional doctoral programs to be the leaders of the future."

App State ensures its Faculty Handbook and accompanying Academic Affairs Operating Procedures (AASOPs) are continuously updated to provide the best support for faculty through ongoing reviews and modifications. The university does not solely rely on fixed review cycles for the entire handbook or sections of the handbook; instead, any proposed modifications can be submitted through the Faculty Governance Committee or AASOPs Review Committee, who make recommendations to the Provost as needs or circumstances arise. This proactive approach allows for changes to be made swiftly, especially necessitated by law or policy.

App State aligns the standard distribution of effort in teaching, research and service in accordance with UNC Policy 400.3.4 for different faculty types. Regarding summer sessions, calculations for faculty workload plans exclude summer efforts unless otherwise specified for faculty members with 10, 11, or 12-month contracts.

- For tenure-track faculty members, the standard distribution of effort each academic year is 60% (10% per 3 credit hour course), with the remaining 40% allocated between research and service. The distribution of the remaining 40% varies based on tenure status, rank, departmental foundational documents and faculty administrative or research endeavors.
- For full-time special faculty, the standard distribution of effort is 80% teaching and 20% service.
- A course buyout is equivalent to a shift of 10% effort within the workload plan.
 While course overloads may not always result in a percentage shift, they are articulated in the workload plan given the extra work required to effectively manage a larger section or additional course.

Definitions:

Organized course section: A course developed and taught by an instructor, published on the registrar's schedule, with at least one student enrolled.

Student credit hour: The credit hours assigned to an organized course section, multiplied by the number of students who receive a transcripted designation for the course.

Faculty contact hours: The instructional time an instructor spends teaching students per term in an organized course section as the instructor(s) assigned to the organized course section. For asynchronous courses, use instruction time or instructional equivalency. For face-to-face or synchronous instruction, 50 minutes of scheduled class time constitutes 1 contact hour.

6. Teaching:

Faculty duties are defined at the departmental level. They are generally consistent with a standard teaching load of 24 credit hours per academic year for a full-time (.75+ FTE) faculty member. The standard load may be adjusted to account for additional responsibilities in research/creative activities or service. The general faculty culture of going above and beyond the standard load is supported by our policy's recognition of a wide range of instructional efforts that contribute to a faculty member's total workload. Faculty actively engage in course development and modernization, particularly in response to technological changes, industry disrupters, and new university initiatives like the QEP (Quality Enhancement Plan). There is a significant focus at App State on student mentorship, including supervising honors theses, supervising competitive research teams, and providing advising outside of formal office hours. Many faculty engage in taking overload teaching assignments, managing large classes, teaching summer courses, and conducting independent studies to support department and student needs. In fall 2024 and spring 2025, 100 faculty (9.3%) reported overload teaching assignments.

7. Measures of Research/Creative Activity: Include a statement and (quantitative and qualitative data) of selected "measures of research and creative activity" for each academic unit.

App State faculty engage in a diverse array of scholarship and creative activities. For many, a substantial amount of this work occurs during the summer when they are not traditionally teaching. A primary focus of this work is writing and submitting manuscripts for peer-reviewed journals. About 65% of the faculty self-reported working on peer-review publications in various stages. Many faculty members participate in specific projects such as writing books, book chapters, and monographs. Another significant area of research and creative activities is grant writing. Faculty apply for both internal and external funding from organizations to support the production of scholarly work. This kind of work often involves undergraduate and graduate students, which helps build the next generation of academic scholars. In fiscal year 2024-25, Appalachian State University brought in \$40.5M in grants.

Faculty also conduct fieldwork and obtain data through focus groups, interviews, and laboratory experiments, which can take several years to complete. Creative activities are also a central component of faculty scholarly activity for some fields. This includes producing creative works such as music compositions, sculpture works, and poetry. Faculty in this area of scholarly work are generally active in their fields as performers, exhibitors, and artists, with a number of them conducting solo exhibitions, commissioned work, and international art residences and festivities. It is worth noting that faculty scholarship and creative activities don't live in a silo compared to the other areas of faculty workload. Many faculty integrate their research and teaching as scholarship informs pedagogical practices and this work often runs parallel to supporting undergraduate and graduate students in research activities.

8. Service Contributions: Include a statement and (quantitative and qualitative data) on selected measures of service contributions for each academic unit.

App State faculty demonstrate a wide range of service contributions that extend across departmental, college, university, community, and professional levels. The self-reported service activities highlighted below represent a broad sampling, not an exhaustive list, of the many contributions made by faculty. The chart below provides a summary of self-reported service activities by faculty. About 30% of the faculty take on significant administrative roles, such as program directors and department chairs, or contribute to key initiatives by leading committees. Over 50% of our faculty extend their expertise to their professional fields by serving as journal reviewers and editors, holding leadership positions on national professional society boards, and organizing conferences. Given App State's somewhat isolated and rural location, there is a strong culture of community engagement, with faculty volunteering on local boards, providing pro-bono consulting and services, organizing service-learning projects that serve our rural communities, and giving public lectures to a variety of groups.

9. Process Evaluation and Compliance:

Full-time faculty work with their department chair to develop their workload plan. In the initial year, this workload plan was developed using a PDF version of the workload plan form that faculty then uploaded into Qualtrics. The form asked a series of questions related to how faculty spent their time in teaching, research/creative activities, and service. In the initial 2024/25 cycle, workload plans were created in the fall semester. Moving forward, workload plans will be developed at the end of the annual review cycle. After the faculty member creates their workload plan in consultation with their department chair, the Dean reviews the workload plans for the college. Below is a graphic representation of the timeline discussed above.

Concluding Remarks:

App State's 2024-25 Faculty Workload Annual Report highlights the institution's commitment to educational excellence. Faculty activities extend beyond formal metrics, encompassing a wide range of routinely expected duties such as course development, student mentorship and managing large classes. Furthermore, the report showcases a robust engagement in scholarly and creative work with 81% of faculty participating in research and creative activities, including publishing, grant writing and artistic production. Service contributions are also a cornerstone of the faculty's work, with nearly all faculty involved in activities at the departmental, university, and community levels, including administrative roles, journal reviews, and community engagement.

Notably, the 2024-25 cycle was marked by the profound impact of Hurricane Helene, during which many faculty members faced the loss of their homes or significant property damage. Despite these personal hardships, faculty not only maintained their professional responsibilities, but also volunteered countless hours to support community recovery efforts—demonstrating exceptional resilience and an unwavering commitment to the community in which we are fortunate to serve.

Certification:

This report was prepared by Jamie Parson, Interim Senior Vice Provost, Faculty Policies Development and Training & Rick Sears, Interim Executive Director of Institutional Research, Assessment & Planning and reviewed by the chief academic officer, Provost & Executive Vice Chancellor Neva J. Specht, before submission.

Re: Action Item - Dining Master Plan Advanced Planning

Date: September 5, 2025

This is a Dining Trust Fund supported project to engage with a single designer to progress the Dining Master Plan to the Advanced Planning phase. Campus Dining will pay for the cost of the designer services by using the fund balance of the Campus Dining Reserve.

The projected cost of the advanced planning work is \$500,000 and falls within the approval threshold of the Appalachian State University Board of Trustees (the "Board").

A University of North Carolina Capital Project Authorization form is attached with additional details.

The scope of the work includes the following:

(1) expand on the Dining Master Plan, which was completed in summer 2025, to begin developing comprehensive design solutions for all impacted spaces and prepare packages for long lead time items. This will allow us to renovate spaces continuously based on the Master Plan Phasing Strategy over the next 4 years, maintain consistent aesthetics across spaces, and purchase equipment ahead of construction to prevent delays in future projects.

This project is time sensitive as this work kicks off the multi-year capital improvement plan of our Campus Dining facilities. University Operations will present full project authority requests to this Board as each phase of the Dining Master Plan is ready to begin the full design and construction process. This request is for advanced planning approval only.

Re: Action Item - Dining Master Plan Phase I Construction

Date: September 5, 2025

This is a Dining Trust Fund supported project to begin the design and construction of Phase I of the Dining Master Plan. Campus Dining will pay for the cost of the designer services by using cash in the Campus Dining Reserve.

The projected cost of the project is \$4,500,000. This project authorization request falls within the approval authority of the UNC Board of Governors and, if approved today, will be presented at the Board of Governors meeting in October 2025.

A University of North Carolina Capital Project Authorization form is attached with additional details.

The scope of the work includes the following:

- (1) Full renovation of 4,600 sf kitchen and servery area in Plemmons Student Union, in the vacated McAllisters restaurant, to serve as a commissary kitchen to support a number of other restaurant concepts across the dining enterprise; This includes a renovation of the existing commercial kitchen and servery spaces; and,
- (2) Creation of a new market on the ground floor of Thunder Hill Residence Hall to allow the existing market space in Trivette Hall to be converted into a future dining concept that will expand dining capacity for the west side of campus.

This project is time sensitive as this work kicks off the multi-year capital improvement plan of our Campus Dining facilities.

Re: Action Item - NRLP Multiple Site Helene Repairs

Date: September 5, 2025

This is a Utility Trust Fund supported project to repair infrastructure damage to New River Light & Power ("NRLP") locations by Hurricane Helene. The primary damage occurred to the Oak Grove Substation when the location was covered with 8 inches of storm debris and mud. NRLP will pay for the cost of the repairs and seek reimbursement through insurance, state funding, and FEMA reimbursement.

The initial estimated cost of the renovation was \$748,000. The Appalachian State University Board of Trustees (the "Board") approved a project authorization of \$748,000 at its March 2025 meeting of the Board.

After engaging in the design phase of the project, it has been determined that the project needs an additional \$223,879 in order to be completed. NRLP has identified a funding source for the added cost. The revised estimated cost for the Board's consideration and approval is \$971,879 and falls within the approval threshold of the Board.

A University of North Carolina Capital Project Authorization form is attached with additional details.

The scope of the work includes the following:

- (1) Oak Grove Substation work to restore the area to pre-storm condition which broadly includes the removal of at least 8" of mud infiltrated stone base and replacing with clean stone, repairing/resetting a number of chain link fence posts, removal and replacement of spalled transformer concrete pad and dike wall, repairing and modifying dike ledges and grading, repairing grounding connections, and other minor work;
- (2) Flood Mitigation Work to improve the site to protect from future flooding which broadly including removal of existing 42" drainpipe and replacement with a dual 48" concrete pipe, new headwall, new and additional yard inlets, regrading and stone base, and a new chain link fence:

- (3) 1915 Greenway Dam Work to include demolition of existing decorative metal fence with gate, install new metal decorative fence with gate, post concrete, and any associated site disturbance and reseeding/mulching; and,
- (4) ASU Switchgear Doors Replace large doors and frame on the south side of the ASU Switchgear structure due to corrosion and sagging.

This project is not time sensitive as the substation is operational. Construction will last approximately nine months upon approval of this revised project authorization.

Article IV—Disability Parking

- Section 1 All faculty, staff and students, including those with disabilities, must obtain an Appalachian State University parking permit appropriate to their University category. Parking for persons with disabilities is governed by North Carolina General Statutes, 20-37.5, 20-37.6, and 20-37.6A.
 - **A.** N.C.G.S. 20-37.6(a) provides that: "Any vehicle that is driven by or is transporting a person who is handicapped and that displays a distinguishing license plate, a removable windshield placard, or a temporary removable windshield placard may be parked for unlimited periods in parking zones restricted as to the length of time parking is permitted. This provision has no application to those zones or during times in which the stopping, parking, or standing of all vehicles is prohibited or which are reserved for special types of vehicles. Any qualifying vehicle may park in spaces designated as restricted to vehicles driven by or transporting the handicapped."
 - Pursuant to N.C.G.S. 20-37.6A, any vehicle displaying "an out-of-State handicapped license plate, placard, or other evidence of handicap issued by the appropriate authority of the appropriate jurisdiction may park in any space reserved for the handicapped pursuant to G.S. 20-37.6."
 - Because wheelchair-accessible parking spaces are limited, individuals
 with properly displayed distinguishing license plates or placards who
 do not require a wheelchair-accessible space are encouraged to use
 other available spaces, if possible, as a courtesy to those who do use
 wheelchairs.
 - **B.** Individuals with disabilities who wish to avail themselves of parking permitted under N.C.G.S. 20-37.6(a) must obtain from the North Carolina

Division of Motor Vehicles ("DMV") and properly display a "distinguishing license plate" or "a removable windshield placard or a temporary removable windshield placard" pursuant to N.C.G.S. 20-37.6(b) and (c). Applications for these license plates and windshield placards may be obtained from the University Parking and Transportation Department or the nearest office of the DMV. Pursuant to N.C.G.S. 20-37.6(c1), the initial application to the DMV must be "accompanied by a certification of a licensed physician, a licensed ophthalmologist, a licensed optometrist, a licensed physician assistant, a licensed nurse practitioner, or the Division of Services for the Blind that the applicant or person in the applicant's custody or care is handicapped or by a disability determination by the United States Department of Veterans Affairs that the applicant or person in the applicant's custody or care is handicapped. For an initial application for a temporary removable windshield placard only, the certification that the applicant is handicapped may be made by a licensed certified nurse midwife."

C. N.C.G.S. 20-37.6(e) makes it unlawful:

- To park or leave standing any vehicle in a space designated with a sign
 [designating parking] for handicapped persons when the vehicle does
 not display the distinguishing license plate, removable windshield
 placard, or temporary removable windshield placard as provided in
 this section, or a disabled or partially disabled veteran registration
 plate.
- For any person not qualifying for the rights and privileges extended to handicapped persons under this section to exercise or attempt to exercise such rights or privileges by the unauthorized use of a distinguishing license plate, removable windshield placard, or temporary removable windshield placard issued pursuant to the provisions of this section;
- To park or leave standing any vehicle so as to obstruct a curb ramp or curb cut for handicapped persons as provided for by the North Carolina Building Code or as designated in G.S. 136-44.14.
- **D.** Violations of these provisions are punishable with civil penalties of "at least one hundred dollars (\$100.00) but not more than two hundred fifty dollars (\$250.00)," and a law enforcement officer "may cause a vehicle parked in violation of this section to be towed." N.C.G.S. 20-37.6(f)(1) and (3).

Section 2 DISPLAY

A Disability Placard issued by the DMV or other appropriate out-of-state authority should be displayed by hanging from the rearview mirror.

Article V—Regulations Governing Parking

Section 1 GENERAL

The control of parking on the campus is necessary to provide for public safety and to permit the proper conduct of University business. These regulations specify where parking is authorized, and all other areas shall be deemed to be unauthorized, and therefore illegal. Inability to locate a legal parking space near where one works, resides or attends class is not a valid excuse for violating parking regulations.

Section 2 REGULATIONS

- A. METHOD OF PARKING: All vehicles must be parked with the rear of the vehicle facing the drive lane with a valid state issued license plate displayed on the rear bumper. Vehicles are prohibited from being pulled through spaces or backed in, unless displaying a valid state issued front license plate on the vehicle bumper with letters/numbers exactly matching the back license plate. Approved front plates may be ordered through the Parking and Transportation Department for \$15.00.
 - *Note: Vanity plates for the front of the vehicle must be displayed from the bumper only and must be state issued.
- **B.** No person shall park a vehicle at any time on campus in an area not specifically designated by pavement markings as a parking space.
- **C.** With the exception of visitor parking in specifically designated areas, visitor parking with a guest pass, or short-term parking in posted time zone spaces, all vehicles parked on the campus are required to be registered for parking privileges from 7:00am until 5:00pm Monday through Friday, unless otherwise posted.
- **D.** Vehicles must be parked in appropriate areas based on their assigned parking privileges.
- **E.** No person shall stop, stand or park a vehicle upon a street or roadway in such a manner as to block the movement of vehicular traffic, except that a driver may stop temporarily to load or unload passengers, or when directed to stop by traffic signs or signals, or at the instruction of a police officer or parking control officer.

Section 4 TOWING FEE

All towing is done by private companies at the request of the Parking and Transportation Department subject to all provisions of Article 7A, Chapter 20. All fees associated with the towing and storage of a vehicle are the responsibility of the vehicle operator or owner. In the event that the operator of the vehicle to be towed arrives at the tow scene prior or subsequent to the tow truck, but prior to actual towing, such operator may be required to pay a service fee to the tow truck driver.

The owner or any other person entitled to claim possession of the vehicle may request in writing a hearing to determine if probable cause existed for the towing. The request shall be filed with the magistrate in the county where the vehicle was towed. The magistrate shall set the hearing within 72 hours of his/her receiving the request. The owner, the person who requested the hearing, or someone other than the owner, the tower, and the person who authorized the towing shall be notified of the time and place of the hearing. The only issue at this hearing is whether or not probable cause existed for the towing. If the magistrate finds that probable cause did exist, the tower's lien continues. If the magistrate finds that probable cause did not exist, the tower's lien is extinguished. At any stage in the proceedings, including before the probable cause hearing, the owner may obtain possession of this vehicle by:

- A. Paying the towing fee, or
- **B.** Posting a bond for double the amount of the towing fee.

Section 5 IMMOBILIZATION

When feasible, the University Parking and Transportation Department may immobilize vehicles in lieu of towing. The vehicle operator will be required to contact the University Parking and Transportation Department to obtain the release of the vehicle. Failure to do so prior to 11:00pm on the date of immobilization may result in the vehicle being towed off campus at the owner's expense.

NOTE: The penalty for any unauthorized tampering with or removal of the device shall be equal to the cost of repair or replacement of the device. The penalty for unauthorized tampering or removal of the device is \$500.00 (estimated replacement cost).

Section 6 RESPONSIBILITY

All persons registered for parking on the campus are responsible for all violations issued to the vehicles they have registered. - **D.** Unauthorized parking in disability spaces and/or reserved spaces is strictly prohibited for any reason.
- **E.** You are responsible for any parking violations pertaining to your vehicle, regardless of whom you allow to operate the vehicle.
- **F.** Familiarize yourself with the Parking and transportation Regulations. Lack of knowledge is not an excuse for committing parking violations.
